Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-15 and 31-43, drawn to a color image-forming method comprising the steps of image-wise exposure of a specific light-sensitive material cut into sheets, and subjecting said exposed light-sensitive material to photographic processing by means of a pair of conveying rollers having a specific sheet conveying speed.

Group II, claim(s) 16-30 and 44-58, drawn to a color image-forming method comprising the steps of subjecting a specific light-sensitive material, different from that in Group I, to a scanning exposure at a specified scan conveying speed followed by conducting color-forming photographic processing on said material.

2. The inventions listed as Groups I do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: each of the color image-forming methods is distinct, characterized by distinct processing conditions.
3. During a telephone conversation with MaryAnn Armstrong on 15 June 2007 a provisional election was made without traverse to prosecute the invention of Group I,

Art Unit: 1752

claims 1-15 and 31-43. Affirmation of this election must be made by applicant in replying to this Office action. Claims 16-30 and 44-58 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-15 and 31-42 are rejected under 35 U.S.C. 102(b) as being anticipated by Yoshida (U.S. Patent No. 6,569,610).

Yoshida discloses a silver halide color photographic light-sensitive material and corresponding color image-forming method, said silver halide color photographic light-

sensitive material comprising a support having thereon photographic constituent layers including at least one blue-sensitive silver halide emulsion layer containing a yellow dye-forming coupler, at least one green-sensitive silver halide emulsion layer containing a magenta dye-forming coupler, and at least one red-sensitive silver halide emulsion layer containing a cyan dye-forming coupler, and at least one light-insensitive hydrophilic colloid layer, characterized in that:

said method comprises the steps of image-wise exposing said material and subjecting said exposed material to processing including a color development process, a bleach-fix process, a rinsing process and a drying process, while said exposed light-sensitive material is processed by means of conveying rollers having a sheet conveying speed of 40-80 mm/sec; AND

said silver halide color photographic light-sensitive material contains a component inclusive of the instant formula (II).

7. Claims 1-15 and 31-43 are rejected under 35 U.S.C. 102(e) as being anticipated by either Ohshima et al. (U.S. Patent No. 7,150,962) or Ohshima et al. (U.S. Patent No. 6,949,334).

Each of the Ohshima patents discloses a discloses a silver halide color photographic light-sensitive material and corresponding color image-forming method, said silver halide color photographic light-sensitive material comprising a support having thereon photographic constituent layers including at least one blue-sensitive silver halide emulsion layer containing a yellow dye-forming coupler, at least one green-

sensitive silver halide emulsion layer containing a magenta dye-forming coupler, and at least one red-sensitive silver halide emulsion layer containing a cyan dye-forming coupler, and at least one light-insensitive hydrophilic colloid layer, characterized in that:

said method comprises the steps of image-wise exposing said material and subjecting said exposed material to processing including a color development process, a bleach-fix process, a rinsing process and a drying process, while said exposed light-sensitive material is processed by means of conveying rollers having a sheet conveying speed of 40-80 mm/sec; AND

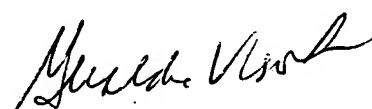

said silver halide color photographic light-sensitive material contains a component inclusive of the instant formula (II).

The applied reference has a common inventor/assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.
